

# THE FARMS APPROACH

1

## INVITATION

---

It is important that any action taken is desired by local leadership. This ensures a high level of responsibility and ownership. For that reason, we only work where we are invited.

2

## CONVERSATION

---

Once we are connected we begin a conversation with open eyes and ears. We want to be learners who actively adapt to the specific context.

3

## PLAN

---

At some point in our conversation then some helpful possibilities emerge. We then work with local leadership to weigh options and create a plan.

4

## TAKE ACTION

---

Time to carry out the plan! This could be funding a loan program, hosting a training, sending a consultant, etc...

5

## FOLLOW-UP

---

We are focused on long-term partnerships and desire to continually improve. This requires monitoring and evaluating the program as well as planning the next step for further development.
